FCC Authorization & Evaluation Division
7435 Oakland Mills Road
Columbia, Maryland 21045-0429.

Subject; Dukane Corp, Handset, Model SRSAC1

Please be advised that the Dukane Model SRSAC1 is a handset transceiver to be employed in a student response system. As such it operates in the 2.5 GHz region and requires FCC certification.

The unit will have the FCC identifier label visible at the time of purchase. It will be located on the flat surface pad next to the battery holder. The users will need to install the batteries. The FCC identifier label will contain the FCC identifier number, the "Dukane" name, and the unique model number, "SRSAC1". It will also contain the IC number.

Due to the FCC identifier label's location adjacent to the battery, this label under all usage conditions will be visible to the user without special tools.

The two part FCC warning statement in Section 15.19(a)3 will appear on page 2 of the manual for this product.

Sincerely,

Ronald Ohlhaber
Director New products and Technology
