Subject: Request to Update Confidentiality and Supersede User Information Exhibits for ABZ99FT4096 / 109AB-99FT4096

Good afternoon Dan,

Please see the attached documents and the following requests:

- a) Updated **Request for Confidentiality** – please note the request to change from short term confidentiality to permanent confidentiality for the Tune-Up Procedure. Everything else is the same as the 2/18/15 request.
- b) Updated **Exhibit D1, Tune-Up Procedure** – please supersede this exhibit on the FCC site. The attached includes final manual copy rather than the draft copy previously submitted.
- c) Updated **Exhibit D2, User / Operational Manual** – please supersede this exhibit on the FCC site. The attached includes the ‘Quick Start Guide’ which is specifically targeted to the final user. The Basic Service and Installation Manual, which was included in error with the initial filing package submission, is not intended for final users and is not intended to be public knowledge. Please remove the existing Exhibit D2 from the FCC site and replace it with this revised Exhibit D2.
- d) If any of items above are applicable to the Industry Canada submission, please make those updates also as necessary.

Thank you very much and I apologize for the additional efforts required on this. If there are any questions or concerns please feel free to let me know.

Sincerely,

Ken Weiss
