Subject: Amendment to Original Application for Lower Power Communication Device
 FCC ID: ACJ927130TX
 TV/VCR With FM Transmitter (88-108 MHz), Model PV-C2080

Gentlemen:

This is an amendment to Matsushita Electric Industrial Co., Ltd.'s application for equipment authorization submitted on November 18, 1999 and assigned for technical review on November 26, 1999. This device is in compliance with Part 15, Subpart C and Section 15.239 of the FCC Rules.

The subject device is a combination TV/VCR with built-in FM transmitter that can send wireless audio signal to any FM radio on carrier frequency 88.1-107.9 MHz. This amendment is to report the FM transmitter circuitry has been modified to improve its performance and frequency stability. This modification includes changing the FM oscillator clock from PPL to microprocessor controlled and will be applied to our pending initial production.

We will submit the following exhibits by next week: (1) amended description of FM transmitter with amended block diagram; (2) amended schematic diagram; (3) revised photographs; and (4) additional test report with affected retest data.

Should you have any questions, please contact the undersigned. Thank you for your attention in this matter.

Sincerely yours,

Richard Mullen
Project Manager
