

FCC Identifier Location Declaration

September 20, 2011
PHC-SJ11-F003

Federal Communication Commission
Equipment Authorization Division
Application Processing Branch
7435 Oakland Mills Road
Columbia, Maryland 21046

Product Name: Panasonic Hearing Aid with 10.6 MHz Transmitter
Models WH-R13C, WH-R15C and WH-R17C

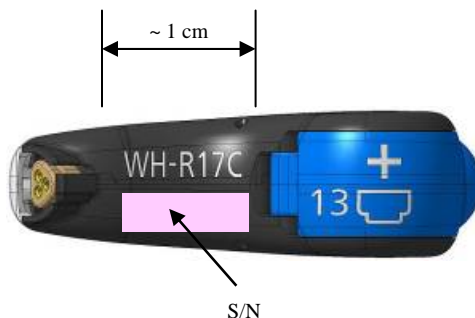

FCC ID: ACJ927150TX³

FCC Rule Part: FCC Part 15C, Section 15.209

To Whom It May Concern:

Pursuant to 47 CFR §2.925, the equipment subject of this filing (FCC ID: ACJ927150TX) shall bear a permanently affixed, readily visible label including the FCC Identifier as specified in 47 CFR §2.926.

However, for the present product, the FCC ID would have a length of about 1.5 cm in font size 4 pt, which is longer than the maximum size of the rating label (see picture below). Therefore it would not be possible to place the FCC ID on the label unless reducing its size to 2 or 3 pt, which would make it difficult to read without magnifying tools. The upper cover of the product incorporates two microphone inputs and one switch, and the remaining space is too small to allow the printing of the FCC ID, too. And the battery compartment is also too narrow for the FCC ID. In addition, it would be undesirable to place the FCC ID label on the sides of the product, as those parts are permanently in contact with the user's skin (to avoid skin irritation, etc.).

For these reasons, the FCC ID will be placed inside the manual as an alternative, in accordance with OET Inquiry 189223.

Sincerely yours,

Richard Mullen

Richard Mullen
Group Manager
Product Safety and Compliance Division

³ FCC ID is to appear in the Operating Instructions as the product enclosure is too small, which is in accordance with OET Inquiry 189223.
