

Antenna Conducted Spurious Emissions

Configuration of the Antenna Conducted Spurious emission

AC Power Line Conducted Emission of Transmitter

Configuration of the AC Power Line Conducted emission

(continued)

9k - 25G Radiated Emission of Transmitter (Spurious and Harmonics)

Configuration of the maximized Radiated emission (Below 1GHz)

Antenna Height: 1.00m, Polarity: Vertical, Angle of turntable: 201deg. (CW)

(continued)

(continued)

(continued)

Configuration of the Equipment Under Test (EUT) :

X axis

Y axis

Z axis
