Conducted output power is 115.88 mW for the base unit and 53.95 mW for the handset. This device must transmit with a source-based time-averaging duty factor as described in this filing. The antenna(s) used for the base unit must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation and transmitter operating conditions for satisfying RF exposure compliance. SAR compliance for body-worn operating configurations is limited to the specific configuration tested for this filing. Body-worn operations are restricted to belt-clips, holsters or similar accessories that have no metallic component in the assembly. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported SAR values are: head 0.43 W/kg; body 0.81 W/kg.
