Conducted output power is 132 mW for the base-unit and 65 mW for the handset. The antenna(s) used for the base-unit must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter. This device must transmit with a source-based time-averaging duty factor as described in this filing. End-users and installers must be provided with antenna installation and transmitter operating conditions for satisfying RF exposure compliance. SAR compliance for body-worn operating configurations is limited to the specific belt-clips/holsters/accessories tested for this filing. The highest reported SAR values are: head 0.33 W/kg; body 0.42 W/kg.
