

The recently revised test report (rev3) is missing the power spectral density plots Figures 31 and 32. Please provide a test report that includes these plots.

Answer: There was an error occurring during the transfer to pdf. Please find revised test report uploaded to your database.

Please tell me the page number in the test report where I can find the 99 % emission bandwidth that agrees with the 1.23 MHz listed on the IC application form.

Answer: page 23 and 27 of part 1 of the test report you would be able to find the 99 % emission bandwidth.
