Subject: Original Application for Licensed Non-Broadcast Station Transmitter
Panasonic All-In-One Headset, Model WX-CH2050
FCC ID: ACJ9TAWX-CH2050

Gentlemen:

Enclosed, find Matsushita Electric Industrial Co., Ltd.'s Application for Equipment Authorization dated May 16, 2003. This device is in compliance with Part 90, Subpart C and in accordance with Section 90.217(b) of the FCC Rules.

The subject device is a wireless headset transceiver. It transmits within 463.6125 ~ 464.3875 MHz frequency band on 32 channels with 800 kHz channel separation with F3E type emission. The occupied bandwidth is less than 12.5 kHz and maximum rated RF output is less than 120mW. Maximum output is variable from 5 to 25 mW by adjusting EVR (IC202 controlled software). The tested sample was adjusted to maximum output position, but due to antenna loss the test report indicated the maximum reported output power was only 9.5 mW. This headset will be used with its associated wireless center module, which was separately authorized under FCC ID's: ACK9TAWX-C1010 and ACK9TAWX-C1020.

The superheterodyne receiver portion of this product operates within 468.6125 MHz ~ 469.3875 MHz frequency band on 32 channels with 800 kHz channel separation. The receiver portion is in compliance with FCC Part 15 Subpart B and will be authorized under Declaration of Conformity.

Should you have any questions, please contact the undersigned. Thank you for your attention in this matter.

Sincerely yours,

Richard Mullen
