Re: FCC ID: ACJ9TGCF-27GSM  
Applicant: Matsushita Electric Industrial Co., Ltd.  
Correspondence Ref No: 17844 / 17845 / 17939  
731 Confirmation Number: EA99423  
Type Product: FCC Part 24E / Licensed Portable Transmitter

Attn.: Errol Chang,

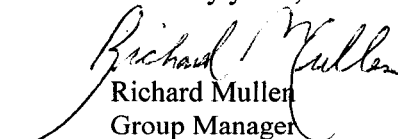

This is in response to your various correspondences and the latest 17939 comments received on 02/01/01 regarding remaining item for requested user information to be provided to satisfy FCC RF exposure requirements. Please note the following collective language that will be added into Panasonic Notebook Computer User Manual when provided with internally installed GSM PCS Module:

#### FCC Warning to Comply With RF Exposure Requirements

- Panasonic Notebook Computer is provided with PCMCIA slots that may be used with other wireless transmitters, which will be specifically recommended, if and when, they become available. Other third-party wireless transmitters have not been RF exposure evaluated for use with this computer and may not comply with FCC RF exposure requirements.
- Notebook Computer may be used with optional internal GSM PCS Module. During wireless mode of operation, keep minimum 1 cm spacing between person's body and computer-mounted antenna.
- The external antenna connection has been approved to operate with a vehicle-mounted antenna not exceeding 3 dBi antenna gain. The antenna should be installed to provide a minimum separation distance of 20 cm or more from persons for meeting FCC RF exposure requirements. Professional installation is recommended.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention in this matter.

Sincerely yours,

  
Richard Mullen  
Group Manager
