January 3, 2002

RE: Matsushita Electric Industrial Co., Ltd

FCC ID: ACJ9TGCF-281

I have a few comments on this Application.

- 1.) Confidentiality letter is not on Applicant letterhead. Please double check Exhibits to be held Confidential.
- 2.) POA not received.
- 3.) External Photos not received.
- 4.) Label not received.
- 5.) Parts List is never required for any Part 15 Intentional Radiator. Do you still wish to upload?
- 6.) RF Exposure Evaluation must be uploaded.
- 7.) Owner's Manual quotes the wrong MPE safe distance for 100mW DSS devices in the 2.4GHz ISM band.
- 8.) Band Edge plot on high channel should show marker at the highest emission above 2483.5MHz, and not simply at the band edge exclusively. Ideally, your table 3-1 should show emissions for all the Channel 11 spurs above 2483.5 in addition to the single measurement point at 2483.5.
- 9.) Annotation for upper band edge plot indicates "pos\_5\_5\_offset". What does that mean?

If you have questions, please let me know.

William H. Graff  
President and Examining Engineer
