RE: ACJ9TGCF-281

To Whom It May Concern:

Our client Matsushita Electric Industrial Co., Ltd would like to certify the CF-28 computer as a wireless notebook. The wireless notebook has a CISCO WLAN card, FCC ID: LDK102040 integrated. Matsushita Electric would like to have their own FCC ID: ACJ9TGCF-281 for the wireless notebook (WLAN and computer). This application is to be approved as a composite wireless notebook.

Included with this application is a letter from CISCO giving permission to use information from the original WLAN card granted application. The confidentiality letter from CISCO must be uploaded with this application, per the request of CISCO. CISCO requested that proprietary documentation must not be available to the grantee.
