RE: FCC ID: ACJ9TGCF-P11

I have a few comments on this Application.

- 1 Please be aware that it is not possible to perform a PC 2 on a non-existent FCC ID. The above ID number does not exist. Nor is it possible to produce a separate ID using a PC2.
- 2 Please be aware that it is not possible to change the ID number of an existing device without a resubmittal. 2.933(a) "Change in identification of equipment" states, A **new application for equipment authorization shall be filed whenever there is a change in the FCC Identifier** for the equipment with or without a change in design, circuitry or construction.
- 3 If you desire to have the FCC ID number above, it will have to be filed as an original equipment authorization. If the device is electrically identical to the referenced FCC ID in your cover letter and there is no change is reported data from the FCC ID mentioned, then in accordance with 2.924 and 2.933 you may submit the following information with a request for original grant.

2.933(b) "An application filed pursuant to paragraph (a) of this section where no change in design, circuitry or construction is involved, need not be accompanied by a resubmission of equipment or measurement or test data customarily required with a new application, unless specifically requested by the Commission. In lieu thereof, the applicant shall attach a statement setting out:

- (1) The original identification used on the equipment prior to the change in identification.
- (2) The date of the original grant of the equipment authorization.
- (3) How the equipment bearing the modified identification differs from the original equipment.
- (4) Whether the original test results continue to be representative of and applicable to the equipment bearing the changed identification.
- (5) The photographs required by §2.1033(b)(7) or §2.1033(c)(12) showing the exterior appearance of the equipment, including the operating controls available to the user and the identification label. Photographs of the construction, the component placement on the chassis, and the chassis assembly are not required to be submitted unless specifically requested by the Commission.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
