Re: Class II Permissive Change Application for Panasonic Single Modular under
FCC ID: ACJ9TGWL14A / Certified Under FCC Parts 15B, 15C and 15E
for Installation within Panasonic Personal Computer, Model FZ-Y1

To whom it may concern:

We, Panasonic Corporation of North America performed SAR test to mount the module WL14A into the portable Host (Panasonic Tablet PC FZ-Y1). But the radiated emission testing was not additionally performed due to the following:

- The original FCC testing of the module WL14A was performed when the antenna was connected to the module in an open environment. Under this application, the WL14A itself and its antennas installed inside the Tablet PC enclosure. The physical restraints introduced by the Tablet PC enclosure should have resulted in equal or lower level of radiated emission.
- And the original FCC testing of the module WL14A was performed with an antenna of higher gain (2.4GHz: 3.24dBi, 5.15-5.25GHz: 3.64dBi, 5.25-5.35GHz: 3.73dBi, 5.47-5.725GHz: 4.77dBi, 5.725-5.85GHz: 4.97dBi). Both WLAN MAIN antenna (Type: PIFA) and WLAN AUX antenna (Type: PIFA) are the same type as the original ones but have lower gain across level of radiated emission.
