Re: Class II Permissive Change Application for Panasonic Single Modular under
FCC ID: ACJ9TGWL15B / Certified Under FCC Parts 15B, 15C and 15E
For Installation within Panasonic Personal Computer Model FZ-M1

To whom it may concern:

Pursuant to CFR§2.1043, Panasonic Corporation of North America hereby requests a Class II Permissive Change (“C2PC”) for the subject application under FCC ID: ACJ9TGWL15B to upgrade U-NII compliance with the new Part 15E rules adopted under Docket No. 13-49.

The most recent issued C2PC for the subject FCC ID was granted on January 15, 2016 by UL Verification Services under our past used PO Control Number ITP-15-F004A.

This C2PC represents:

- a) The previous issued U-NII grant was based on 5 GHz old Part 15E rules. This C2PC application is to seek approval under the 5 GHz new rules to allow this device can continue to be manufactured, imported, marketed and/or installed after June 1, 2016 transition period. There is no hardware or software change.
- b) Tune-up to operate at a lower power setting than the maximum power allowed for this module but at a same power setting as used in the SAR report approved on January 15, 2016.
- c) The additional testing is conducted only for UNII-3 band because the original test results for UNII-1, UNII-2A and UNII-2C show compliant with the FCC KDB 789033 D02 General UNII test Procedures New Rules v01r01.
- d) Software security per FCC KDB 594280 D02 is still valid the same as original grant, January 15, 2016.

This change does not affect the other FCC Part 15 grants under classifications JBP, DTS and DSS because there is no changes to the employed digital device circuitry.

We take the responsibility to ensure the module complies with all requirements after integration into the host PC.

Authorized by,

Richard Mullen
Group Manager
Panasonic Corporation of North America
