Re: Class II Permissive Change Application for Panasonic Single Modular Model WW12D under
FCC ID: ACJ9TGWW12D / Certified Under FCC Parts 22H, 24E and 27
(Class II Permissive Change for Installation within Panasonic Personal Computer Model CF-C2)

To whom it may concern:

Pursuant to CFR § 2.1043, Panasonic Corporation of North America hereby requests a Class II Permissive Change for its application with FCC ID: ACJ9TGWW12D, which was granted on September 27, 2012 by Compliance Certification Services.

This authorization only covers the Class II permissive change application for the following changes:

- Mobile to Portable Classification
- Installation into Panasonic Tablet PC with proximity sensor (Model: CF-C2)
- The CDMA mode of WW12D used in the Host PC CF-C2 is specially programmed and tuned to operate at a lower power setting than the original maximum power to ensure that the output power does not exceed the targets described in the SAR report.
- Collocation with 802.11a/b/g/n + BT Half Mini card (model: WL12A) with pre-existing FCC ID ACJ9TGWL12A, whose SAR test data is included in this application..
- Decrease in Frequency/Band Capability; Per KDB178919 (4.b) GSM/UMTS functionality has been removed via a fixed & permanent software change. The WW12D used in the Host PC CF-C2 will only support CDMA Bc0/BC1, and LTE Band 13.
- No other radio parameters have been changed

Sincerely your,

Richard Mullen
