Power Reduction Graph For LTE Band 25

The graph illustrates the relationship between the distance from the antenna and the module power for different LTE bandwidths. The Y-axis represents Module Power in dBm, ranging from 5 to 30. The X-axis represents Distance in mm, ranging from 26 to 11. The legend indicates six data series: LTE BW 20MHz (purple), LTE BW 15MHz (blue), LTE BW 10MHz (orange), LTE BW 5MHz (light blue), LTE BW 3MHz (red), and LTE BW 1.4MHz (green). All series show a sharp drop in power at a distance of 18 mm.
