Re: FCC ID: AEKA54027

To Whom It May Concern:

This will serve as a Class II Permissive Change request for the above mentioned FCC Identifier.

The manufacturer has changed the outside housing of the transmitter for marketing purposes. There have been no changes to the electronic circuitry or the RF.

We have performed radiated emissions testing and there is no degradation from the original test data and there is no change in the output power. The data in the test report shows that it still continues to meet the FCC requirements for this class of equipment.

Should you have any questions or require any further information, please advise.

Regards,

A handwritten signature in black ink that reads "Mario de Aranzeta". The signature is fluid and cursive, with "Mario" on the top line and "de Aranzeta" on the bottom line.

Mario de Aranzeta
Engineer
