RE: FCC ID: AFJ289401\_ATCB005893  
Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please also note that because of the very large number of parts affected, if exposure may also be affected and should be either retested or justification as to why and how the original SAR report applies to the changes should be provided. Please provide either a new SAR report or an attestation that SAR was not required and that the original SAR report still represents the device in the PC.
2. FYI - As the FCC band listing policy occurred after the original grant date for this device, it is not sure how the FCC wants the frequencies to be listed. The original frequencies were 400-470MHz. However, the band listing policy does not allow the 400-406.1 frequencies. A question has been sent to the FCC for clarification.
3. Please clarify if the list of parts shown in the reason for PC are additional parts, value changes or parts removed. Was a board re-layout done? If so, to what extent? Were traces moved, removed or deleted? If so to what extent?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
