Silver characters, Arial, 4 point font bold, centered below restricted use box.

MATERIAL SPECIFICATIONS:

1. **MATERIAL** - .010 thick clear Lexan film (#8B35) with velvet/matte finish.
2. **ADHESIVE** - Part to have .002 thick "tamper proof" destructive adhesive (Scotch #467 or Engineering approved equivalent) with an easy to remove liner.
3. **GRAPHICS** - To be sub-surface printed on the matte side per Ritron art work definition (see type specifications above), registered to the part edge as shown in View A. Background color to be black.
4. **The area designated for the SERIAL NUMBER** will be silver, and is 0.55" x 0.10". Serial number characters are black, 8 point size. Serial number to be centered within the silver area.
5. The box outline area for the FCC RF Notice is 0.88" x 0.16", 0.20 pt. silver line. A vertical silver line, 0.20 pt., is located 0.13" from the left edge of the box to separate the NOTICE! symbol and the FCC RF warning text.
6. **NUMBER SERIALIZATION** to use hot stamp process on .0015" silver compucal material with bold black print.
7. **NOTICE! symbol and JOBCOM logo** provided on stat sheet, silver graphics.

NOTES:

1. Graphics to be registered to the edge of the label within +/- .010"
2. The JOBCOM logo graphic shown on this drawing is for reference only. Ritron to supply original artwork for JOBCOM logo graphic.
3. Number Serialization to start with J42345 with number incremented by one on each label.
4. The FCC/Model label for the JV-110 will use the above materials/specifications or a RITRON approved equivalent.
5. Vendor will supply photoproofs for RITRON Engineering approval prior to manufacturing production labels.
6. No changes to label without RITRON engineering approval.
