**Re: Long-Term Confidentiality Request for Installation Manual  
FCC ID AJK8223586**

To Whom it May Concern:

Pursuant to Sections 0.457 and 0.459 of the Commission's Rules, Rockwell Collins, Inc. requests long-term confidential treatment of an existing exhibit marked "**Installation Manual**" that was inadvertently submitted during a prior equipment authorization application. The Installation Manual contains trade secrets and proprietary information not customarily released to the public. The public disclosure of these materials may be harmful to Rockwell Collins, Inc. and may provide unjustified benefits to its competitors.

The Installation Manual contains technical information intended for professional technicians who are qualified to install the device on aircraft. There is no public access to this information because the device is sold under an NDA and only qualified technicians are permitted to install equipment onto aircraft.

All sales of this non-consumer device are under an NDA, including third party sales, and the final user of the device is subject to an NDA.

Included with this request is an executed NDA between Rockwell Collins, Inc. and a customer. Customer information has been redacted due to confidentiality requirements. Rockwell Collins, Inc. has a master sales agreement with this customer that references this NDA for all purchases. This NDA is extremely broad and covers any type of product designs, specifications, drawings, and methods, which includes the Installation Manual. The Manual is also labeled "Collins Aerospace Proprietary."

Thank you for your consideration of this matter.

Very truly yours,  
Rockwell Collins, Inc.

Thomas A. Voltero, Jr.  
Senior Counsel
