

A photograph showing the internal components of a mobile phone. The phone's back cover is removed, revealing the internal circuitry. A large, rectangular, silver-colored battery is visible, with a label that includes the text "3094001150344" and "3094001150344". To the right of the battery is a green printed circuit board (PCB) with various electronic components, including a SIM card slot and a small antenna. A black plastic component, likely a speaker or microphone, is visible on the left side. Several red wires are connected to the bottom of the phone. The phone is placed on a blue surface.
