Columbia, MD. 21046

Date: Dec. 28, 1999

Attention: Authorization and Evaluation Division

Subject: RFI related modifications incorporated into unit with **LCD MONITOR**
-- *Class II Permissive Change* -- **FCC ID: AMPL51A**

This letter serves as our declaration that all modifications listed below were implemented in the sample submitted for testing. We further declare that the same modifications will be implemented into all production units to enhance compliance of the units to FCC limits.

The modifications include the following:

- 1) Added two ferrite cores on the video cable outside the LCD monitor. (see photo 2)
- 2) Added a metal cover on the component side of main board. (see photo 5)
- 3) Added a metal cover on the component side of power board. (see photo 5)
- 4) Added a metal cover on the component side of inverter board. (see photo 5)
- 5) Added two ferrite cores on the wire connected between main board and power board. (see photo 6)
- 6) Added a ferrite core on the wire connected between main board and front control board. (see photo 6)
- 7) Added a ferrite core on the wire connected between main board and inverter board. (see photo 6)
- 8) Added copper foils on the four sides of LCD panel for EMI. (see photo 8)
- 9) Added a copper foil on the two wires from main board. (see photo 10)
- 10) Added two ferrite cores on the DC output cable of power adapter. (see photo 21)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Mike Su of ADT Lab. at fax No.: 886-2-2602-2943 or E-mail: mike@mail.adt.com.tw

Sincerely yours,

Kent Tsai / Manager
