Dear Mr. Desmarais:

SUBJECT: Uniden MHS335BT Portable VHF radiotelephone

Mr. Shayne Zhu of Shenzhen Huatongwei International Inspection Co. Ltd, requested that I review an application for a TAC under RSS-182 with respect to the Uniden MHS335BT portable VHF radiotelephone and its variants, the VHF470B and VHF470G.

In terms of Table 4 of RSS-182, Issue 5, this portable VHF radiotelephone (voice and DSC) is suitable for voluntary carriage onboard Canadian vessels. Subject to the equipment meeting the requirements of Industry Canada, this equipment should be issued a TAC without an equipment designator to indicate that it is a portable VHF radiotelephone not complying with IMO requirements and intended primarily for carriage on board voluntarily-fitted ship stations.

Yours sincerely,

Russell Renaud
