The applicable difference between the AESU and the FFS is the enclosure dimensions. The other boards in the enclosure are performing digital processing and are not affecting the transmitter characteristics. As what has changed are the AESU enclosure dimensions, these are as follows: height 7.64 inches, width 10.11 inches, and depth 12.56 inches.

A handwritten signature in black ink, appearing to be "H. H.", is written over the end of the paragraph.
