Re: 8.33 kHz Channel Spacing for FCC ID: AOIRTA-50D

To Whom It May Concern:

Honeywell is aware that the 8.33 kHz Channel Spacing will get a Grant of Certification, but that there is no U.S. (United States) Rulemaking for 8.33 kHz operations and this operation will not be exercised within the U.S. per the FAA.

Sincerely,

Honeywell International Inc.

  
Keith Peavler  
Chief Engineer
