material: plastic
finishes: matte
color: transparent

JBL FLIP 4 / ROPE KNOT

Artworks - Scale 1:1 - Unit: mm 13/02/2017

Step 1

Fold your cord in half, then make a loop with the right strand. Twist it in a clockwise direction to get the loop facing the right.

Step 2

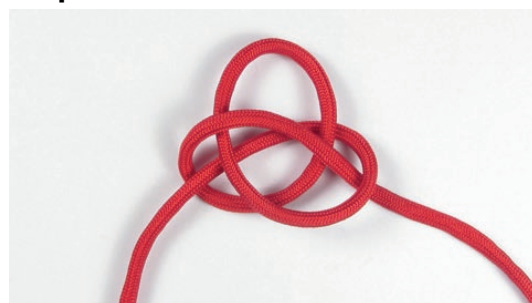

Feed the left cord through the loop, under-over.

Step 3

Pass the left cord over the right.

Step 4

Then behind the top loop and through the left loop.

Step 5

Tighten. At this point simply repeat the sequence to line up more wall knots.

Step 6

Make a loop with the right cord.

Step 7

Pass the left cord through, under-over.

Step 8

Pass the left cord over the right.

Step 9

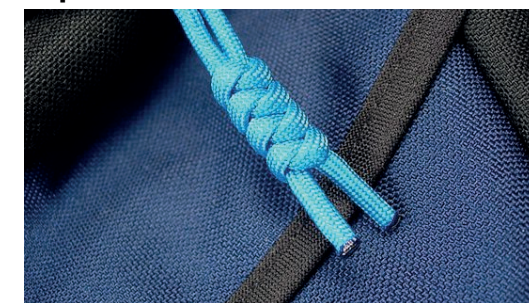

Then pass the left cord behind the top loop and through the left loop.

Step 10

And tighten. Then repeat those 10 steps one more time to get a 4 layers knot (cf. blue knot on the picture).

Expected final result
