RE: FCC ID APV-3030HBT
IC: 5843C-3030HBT
M/N: LMU30H30BT3

By my signature below, I attest:

The Datasheet sheet has general info to cover all LMU3030 variants:
LMU 3030 CDMA, LMU3030 GPRS, and another one use u-Blox LISA U200 which support the 5 HSPA bands.

The product specified above use the Gemalto EHS5-US (QIPEHS5-US) which support only two bands
850/1900 GPRS, EGPRS and WCDMA and can be found in the FCC docs of the cellular Radio

Sincerely,

October 27 2014
