Hello Steve,

Review of this applicaton is complete. This is the DSS (BT) composite part. There is only one issue that needs to be addressed as follows.

Q1: The application power entry was 0.00163 W. The test report (page 46/73) shows a maximum power of 0.00197 W in 3SH5 mode. The application information will be changed to 0.00197 W based on your reply confirmation that this is correct.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Tim Dwyer

Hello Tim,

Thanks for your review of the application.

In regards to your question Q1, we don't understand exactly what you are referring to by "the application power entry was 0.00163 W". Do you mean the value (0.00163W) indicated in the BT test report on page 44/73? Please clarify.

Best regards,

Steve Petruska

Hi Steve,

Apologies for not replying sooner, but my incoming emails seem to be getting delayed today.

The CCS application form (similar to FCC 731) entry was 0.00163 W. The test report page 46/73 shows 0.00197 W as the maximum power measured, so that should be what gets entered and listed on the grant. Sorry, but since you (or your agent) entered the information, I am not allowed to just change it without your consent.

Best regards,

Tim

Tim,

Attached is a copy of the "Letter of Authorization", just in case you need it.

As I mentioned, CCS keeps this on file so we don't have to send a copy with every application.

Regards,

Steve

Hi Tim,

Please proceed to correct the entry to the maximum value (0.00197 W) as indicated in the test report.

Thanks,

Steve Petruska
