

Date: 6 June, 2003

RE: Sharp Corporation

FCC ID: APYNAR0050

Dear Mr. Dennis Ward,

Regarding the above referenced application, please find our reply to the remaining comments to your inquiry dated: May 29, 2003

- 1) The proper FCC ID number is the one on application documents. We correct FCC ID number on label drawing. Please find uploaded "Revised Label Drawing."
- 2) The least margin is 12.8dB (0.1500MHz) on page 17 of the test report. The result is 53.2dBuV and the margin to AV is 2.8dB. The measurement uncertainty for this test was +/- 1.3dB, as shown on page 6 of test report. The margin to AV is more than the uncertainty, and thus we conducted QP only.
- 3) Please find uploaded "Revised Schematics."

We hope the above reply is satisfactory.

If any problems, please let us know.

Best regards,

Yukari Ito (Ms.)

UL Apex Co., Ltd.
