Subject: Revised Confidential Treatment Request for Schematics, Internal Photographs, Circuit Description, and User's Manual

Reference: FCC ID: AS5BBTRX-03

Dear Examiner:

Pursuant to 47 CFR 0.457(d) and 47 CFR 0.459 of the FCC Rules, this is our revised confidential treatment request that the following documents be kept confidential and be withheld from public inspection. The information contain in these documents which is submitted to the FCC are considered a trade secret and not routinely available to the public.

The reason the material should be withheld from public inspection is the exhibits listed contain schematics, detailed block diagrams, detailed operational descriptions, and parts lists that are proprietary. This information is not publicly available.

The '9442 RRH2X40-07L' FCC ID AS5BBTRX-03 will not be sold to the general public, but restricted to network operators. The 'User's Manual' is descriptive technical manual and contains Alcatel-Lucent Proprietary information and is provided to the network operators only. The general public does not have access to User's Manual of '9442 RRH2X40-07L'. Every page of the User's Manual is conspicuously marked "Alcatel-Lucent-Proprietary." Furthermore, the User's Manual states on Page 178: *"This unit is only to be installed in restricted access locations."*

Disclosure of internal photographs could reveal to a competitor certain proprietary design, parts information and manufacturing techniques. Disclosure of Internal photographs could cause Alcatel-Lucent substantial competitive harm. The Internal photographs, Schematics, Circuit descriptions and Block Diagrams contain Alcatel-Lucent Proprietary information.

Therefore, Alcatel-Lucent requests to treat the following as confidential:

- (1) User's Manual
- (2) Internal photographs
- (3) Schematics, Circuit descriptions and Block Diagrams

Thank you for your attention in this matter

Sincerely,

Dheena Moongilan
Distinguished Member of Technical Staff
Alcatel-Lucent
Room MH-5A-115
