<b>FCC ID</b>	ATMUART1WL
<b>Agent</b>	Fred Weiss
<b>Approval Type</b>	Original
<b>Equipment Class</b>	DTS Digital Transmission System
<b>Rule Part</b>	15.247 (15C)

**Overview**

This application is for an original approval of the NS-RB1 wireless audio sender/receiver product. The device has been classified as a mobile device per FCC Part 2.1091. The NS-RB1 will be marketed under two model numbers: NS-RB1 as an accessory to the Insignia NS-R5101 AHD-A AVR system and model UT-T1WL by Onkyo. Both models are electrically identical and will bear the same FCC ID label. The only difference is an internal resistor which identifies the model to the host system. Test report documentation references this radio as model IRT because at the time of testing the exact model numbers were unknown.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Short term confidentiality requested.

**Recommendation**

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
