To Whom It May Concern

Subject: Differences Between Module S01-051G and S01-050J

Applicant: MULTI TECH SYSTEMS INC

FCC ID: AU792U22C01871

Dear Sir/Madam:

The PCBA Layout, the RF Design / RF performance and Antenna type of the 2 modules S01-051G and S01-051J are **exactly the same**.

The differences between the 2 modules are:

- the value of resistor R27
- the module S01-051J has 2 capacitors C15 and C16 populated on board, while the module S01-051G does not have them.

The above differences are nothing related to the RF Design/RF performance of the modules.

Sincerely,

Signature
