Index for Exhibit

<u>Exhibit #</u>	<u>Description</u>
2A	Protection Against Unauthorized ESN and Firmware Upgrades
2B	Certification of Data
2C	Compliance Statement to Part 22.921, 911 Call Processing Procedures

Exhibit 2A

As per 22.919, Electronic Seal Numbers

Protection Against Unauthorized ESN and Firmware Upgrades

The Cellular portable phones use Electronic Serial Numbers (ESN). The ESN is a unique identification number to each phone that is contained in a component and is automatically transmitted to the base station whenever a cellular call is placed. The ESN is stored in a nonvolatile memory component that is permanently attached to the main circuit board. The ESN host component is isolated from fraudulent contact and tampering. Any attempt to change the ESN will render the portable inoperative.
