Columbia, MD 21046

Subject: Class II Permissive Change application to Certificated Transmitter with  
**FCC ID: AZ489FT3804.**

Gentlemen:

Motorola Inc, 8000 West Sunrise Boulevard, Fort Lauderdale, Florida, herein submits a Class II Permissive Change application to the Certificated Transmitter with FCC ID: AZ489FT3804.

A new battery option, model NTN9862A, is being offered with this product and the reason for this submittal is the degradation of the highest reported SAR limits on file at the FCC.

The highest SAR results for this new battery option is still compliant with the FCC Occupational/Controlled RF Exposure Limits of 8.0 mW/g.

Since no other changes were done to this radio except for the addition of the new battery option, we are only attaching an addendum to the SAR Report on file at the FCC. All other data on file at the FCC remains compliant.

We are also requesting that you add FCC Rule Part 80 on the grant to cover Maritime applications. This product also meets the technical requirements of Rule Part 80.

Contact Mike Ramnath at (954) 723-5793 or Fax (954) 723-4794 if you require any additional information.

Sincerely,  
*/s/ Mike Ramnath (signed)*
