Subject: Class II Permissive Change Request for Certified Transmitter with
FCC ID: AZ489FT4826.

Gentlemen:

Motorola Inc at 8000 West Sunrise Blvd, Ft. Lauderdale, Florida 33322 is requesting a Class II Permissive Change to the above Certified transmitter.

The changes to the transmitter are as follows:

1. The Power Amplifier was replaced with one that has the identical footprints and performance specifications.
2. The LDMOS Driver was changed.
3. The leaded reference Oscillator was phased out with a SMT type Oscillator.

Performance data on Radiated and Conducted Spurious Emissions were obtained in accordance with 47 CFR 2.993. Revised Exhibit 6, attached shows that all Spurious Emissions are within FCC limits but Exhibit 6G, Radiated Spurious Emissions, exceeded those submitted to the FCC in the original filing. Thus prompting the request for a Class II Permissive Change request.

All other data on file, including RF Exposure Data, with the FCC continues to be compliant.

If you have any questions in the interim, please contact me at 954-723-5793.

Sincerely,

Mike Ramnath
FCC Liaison
