**Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC Certified Transceiver
with FCC ID: AZ489FT4826**

Dear Sir / Madam,

A Class 2 Permissive Change is requested for UHF Band 1 Portable (the subject transceiver) which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

Piece part conversion on Passport Option Board from non-Environmental Preferred Parts (non-EPP) compliant to Environmental Preferred Parts (EPP) compliant. The components are compliant to 12G02897W18 Controlled, Restricted and Reportable Materials Disclosure (RevG, Appendix C, Sec. 2) and 12G13933A12 Component Temperature Requirements To Support "PB-Free" Solder (12G02897W18 & 12G13933A12).

B. PERFORMANCE DIFFERENCES:

Performance data on radiated spurious emissions was obtained in accordance with 47 CFR 2.1053. Attached results shows that radiated spurious emissions (2F_c, 3F_{c6} & F_c) have degraded compared to those in the original filing but are still FCC compliant.

C. CONCLUSION:

This radio continues to meet all FCC emissions and RF Exposure requirements for which authorization was granted. However, the radiated spurious emissions are degraded to those originally reported, thus triggering a Class-2 Permissive Change request.

Sincerely,

/s/ Mike Ramnath (signed)
