**Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED Transceiver  
with FCC ID: AZ489FT4834**

Dear Sir / Madam,

A permissive change is requested for UHF Range 2 Portable (the subject transceiver) which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

Components were added to improve Adjacent Channel Power and radiated spurious emissions in the R&TTE directive.

B. PERFORMANCE DIFFERENCES:

Performance data on radiated spurious emissions was obtained in accordance with 47 CFR 2.1053. All radiated emissions performance measurements were performed at the Motorola Plantation Facility OATS, which is an FCC listed site. Attached results shows that radiated spurious emissions (2Fc) has degraded compared to the original filing but are within the FCC limits. Attached results also shows that conducted spurious emissions (3Fc) has degraded compared to the original filing but are within the FCC limits.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted. However, the radiated and conducted spurious emissions are degraded to those originally reported, thus this change does meet requirements a Class2 Permissive Change.

Sincerely,  
*/s/ Mike Ramnath (signed)*
