Federal Communications Commission Laboratory
7435 Oakland Mills Road
Columbia. MD 21046

Att: Andy Leimer.

Subject: Response to correspondence number 13959 for FCC ID: AZ489FT4841.

Dear Mr. Leimer:

We have amended the Test Report, Exhibit 6, to include antenna data, power conversion and the test procedure for measuring Power. The ERP is calculated from the Conducted Power and the gain (loss) of the antenna used. The calculated ERP is 0.344 Watt which is 0.58 Watt conducted with -2.4dB antenna gain.

We are also enclosing a more recent User's Manual and Schematics.

We trust that the above information satisfies your requirements. Contact me at (954) 723-5793, if you require any additional information.

Sincerely,

Mike Ramnath.
FCC Liaison.
