**Subject: Class 2 Permissive Change Request to FCC Certified Transceiver
with FCC ID: AZ489FT4844**

Dear Sir / Madam,

A Class 2 Permissive Change is requested for the GP638PLUS, UHF Range 1 Portable (the subject transceiver) which is marketed in the United States and elsewhere.

The change is adding more grooves onto the chassis at the bottom and side of the radio so that the o-ring tabs can be better seated. There are no other changes to the radio.

Performance data on radiated spurious emissions was obtained in accordance with 47 CFR 2.1053 at the Motorola Plantation Facility OATS, which is an FCC listed site. Attached results shows that radiated spurious emissions (2Fc) had degraded but continues to be compliant.

This radio continues to meet all FCC requirements for which authorization was granted. However, the radiated spurious emissions are degraded to those originally reported, thus requiring a Class 2 Permissive Change.

Sincerely,

/s/ Mike Ramnath (signed)
