**Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO AUTHORIZED Transceiver
with FCC ID: AZ489FT4881**

Dear Sir / Madam,

A Class 2 Permissive Change is requested for XTS4000 Band 380-470 MHz Portable radio (the subject transceiver) which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

The overall design is identical to the existing XTS4000 except that a new higher capacity (1260mAh) battery is added to the list of approved accessories.

B. PERFORMANCE DIFFERENCES:

Performance data on RF Exposure (EME) was obtained in accordance with 47 CFR 2.1093. All exposure measurement (EME) were performed at the Motorola Plantation Facility EME Lab. Attached results shows that RF Exposure measurement (EME) has degraded compared to the original filing but are within the FCC limits.

C. CONCLUSION:

This radio continues to meet all spurious emissions requirements for which equipment authorization was granted except for RF Exposure which has degraded, but still compliant, to those originally reported to the FCC, thus triggering a Class-2 Permissive Change request.

Sincerely,

/s/ Mike Ramnath (signed)
