Subject: Application for a Class 2 Permissive Change application of Transmitter with
FCC ID: AZ489FT4882, 438-470 MHz, RDU4100 UHF model

Gentlemen:

Motorola Inc, 8000 West Sunrise Boulevard, Fort Lauderdale, Florida, herein submits its application for a Class 2 Permissive Change request of the subject transmitter.

This transmitter is primarily intended to be use in a portable radio application with capabilities for clear communications with transmit output power of 2 or 4.0 Watt (Nominal) and 2.4 or 4.2 Watt (Max).

The RF antenna connector was redesigned to prevent breakage and to provide a more reliable RF connection between the radio and the antenna. Pilot units were resubmitted for RF Exposure and Radiated Spurious Emission measurements. The RF Exposure and Radiated Spurious Emission data continue to be compliant but degraded to the data on file at the FCC, thus triggering a Class 2 Permissive Change request.

All other data on file at the FCC continues to be compliant.

Contact me (954) 723-5793 or Fax me at (954) 723-4794, if you require any additional information.

Sincerely,

/s/ Mike Ramnath (signed)

Manager, Regulatory Compliance
