Subject: Application for a Class 2 Permissive Change to the certified Transmitter with FCC ID: AZ489FT4893, 136 – 174 MHz/ 450 - 520MHz.

Dear Sir / Madam,

Motorola Solutions is requesting a Class 2 Permissive Change to the Portable 2-Way Radio certified Transmitter with FCC ID: AZ489FT4893. The change is to add a UHF Rang 2 GPS antenna, FAF5260A, to the existing APX7000/APX7000XE certification.

Specific Absorption Rate (SAR) measurements performed at Motorola Solutions Inc. EME Test laboratory have degraded but are still compliant with the addition of the new antenna. Thus, triggering a Class 2 Permissive Change application per the requirements of 47 CFR 2.1093(d).

The subject transmitter complies with Section 90.203 of the Rules in that the operator cannot directly program transmit frequencies using the unit's normally accessible external controls.

All other data reported to the FCC at the time when Certification was granted continues to be compliant.

If you require any additional information contact Mike Ramnath at (954) 723-5793.

Sincerely,

Mike Ramnath (signed above)
Manager, Regulatory Compliance
