

Exhibit 1A. General Information

1A.1. Production Plans

Quantity production is planned.

1A.2. Application References -- Pursuant to 47 CFR 2.948 and 2.1061

Reference is made to the following Motorola "Application References"

1. Open Area Test Site "OATS"
FCC Registration: 91932
Industry of Canada: IC3679
2. ISO / IEC Guide 25-1990 accredited by The American Association For Laboratory Accreditation (A2LA) Motorola EMC Lab.

1A.3. Data Submittal Procedure

Data located in Exhibit 6 is supplied in accordance with 47CFR2, Sub-part J and Part 90, Sub-parts I and Sub-part S of the Commission's rules. Declaration of Conformity in page 6 of User's Manual in Exhibit 8 is provided in accordance with 47CFR2.1077(a).

1A.4. Similar, currently Certified Transceiver

FCC ID: AZ489FT5799 and AZ489FT5789

1A.5. Additional Considerations

This transceiver can function as a Part 15.3(r) computer peripheral device when functioning as an RF modem when connected to a computer via a data cable accessory (ref: Exhibit 12.1).

In addition, this transceiver can function as a hand-held Part 15.3(k) computer executing application programs even when not connected to a companion trunked system base station control channel.

A Declaration of Conformity is provided in Exhibit 8 as evidence of compliance with Part 15 requirements for these additional Class B digital device functionalities per 47 CFR 15.101(a).

Compliance with Part 15 requirements for the superheterodyne receiver has been determined by verification in accordance with 47CFR15.1.
