Re: **Application for a Class II Permissive Change request to certificated transceiver with FCC ID: AZ489FT5843.**

Gentlemen:

Motorola Inc., 8000 West Sunrise Boulevard, Fort Lauderdale, Florida 33322, herein submits its request for a Class II Permissive Change for the above transceiver, which is marketed in the United States and elsewhere as the iDEN i930. The modified radio will be market as the iDEN i920.

A. DESCRIPTION OF PRODUCT CHANGES:

An electrical change was made in the i930 radio wherein the camera module and associated flex circuitry were removed. The external Flip Lens was modified to eliminate the camera port, and simple graphics changes were made to both the internal and external lenses.

B. DESCRIPTION OF PRODUCT PERFORMANCE IMPACT:

Transmitter radiated spurious emissions data were obtained for the i920 in accordance with 47 CFR 2.1053. There was an occurrence where the spurious emission measured exceeded that detailed in the original filing, but is still well below the FCC limit. A revised Exhibit 6.4 (Figure 6.93) attached contains the new data showing that all radiated spurious emissions are within FCC limits. All spurious emission measurements were performed at the Motorola Plantation EMC Laboratory, FCC Registration No. 91932.

C. CONCLUSION:

This radio product continues to meet all FCC requirements for which the Equipment Authorization was granted. Since the radiated spurious emissions exceed those originally reported, this change does not meet the requirements for a Class 1 Permissive Change. However, the performance data continue to comply with FCC limits, thus meeting the requirements for a Class II Permissive Change, in accordance with 47 CFR 2.1043. All other data, including SAR, on file with the FCC for this transmitter continue to be compliant.

Please contact me at (954) 723-5793 if you require any additional information.

Sincerely,

/s/Mike Ramnath (signed)
