EXHIBIT 2

Statement of Certification

(Persuant to FCC Part 2.907, 2.908 and RSP 100 Sec 9.1)

2.1 Statement of Certification

Transceiver type described herein (AZ489FT5875/109U-89FT5875) is in compliance with all applicable parts of the FCC rules and ISED RSS standards.

Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

2.2 Attestation Statement (Equipment Class DSS – ISM 900MHz)

This device is compliant with the applicable FCC Part 15C and ISED RSS 247 regulations as below.

Part 15.247 (a)(1) / RSS 247 Section 5.1

- The hopping sequence must be pseudo random.
- Each frequency must be used equally on the average by each transmitter
- The receivers input bandwidth is approximately equal to the transmit bandwidth
- The receiver hops in sequence with the transmitted signal

Part 15.247 (a)(1) / RSS 247 Section 5.1

- The system is designed to comply with all of the regulations in this section when the transmitter is presented with a continuous data (or information)

Part 15.247(h) / RSS 247 Section 5.1

- The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.
