Re: FCC ID: AZ489FT7002
Applicant: Motorola, Inc.

Gentlemen:

Spectrum Technology, Incorporated has tested the above referenced transmitter in accordance with the applicable requirements contained in the Parts 2 and 24 of Title 47, CFR. To the best of my knowledge, these tests were performed using the criteria established in TIA/EIA, ANSI or other Industry standards. The measurements demonstrate that the equipment continues to comply with the transmitter limits established in Part 24 and conditions noted on the original grant of Certification for the FCC ID: IHDT6AC1. The digital device emissions meet the Class B limit and the receiver is exempt from the Part 15 requirements. The applicable rule sections are listed in the following test report.

The open area test site used for the radiated emissions measurements is located at Fluke Park II in Everett, Washington. Site information required by Federal Communications Commission under Code of Federal Regulations 47 Paragraph 15.38, and Public Notice 24541 in accordance with ANSI C63.4-1992, was filed with the was filed with and accepted by the FCC Sampling and Measurements Branch in August of 2001.

This site is also acceptable to Industry Canada for the performance of radiated measurements. Test Site information required by RSS-212, Issue 1 (provisional) was most recently renewed with IC in January 2002. The site file number is IC 2089.

Sincerely,

A handwritten signature in black ink that reads "Rod Munro". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Rod Munro
