Re: FCC ID: AZ489FT7006  
Applicant: Motorola, Inc.  
Models: FLN3134A, FLN3135A

Gentlemen:

QualiTech Experts Ltd. has tested the above referenced transmitter in accordance with the applicable requirements contained in the Parts 2 and 15 of Title 47, CFR. To the best of my knowledge, these tests were performed using the criteria established in ANSI or other Industry standards. The measurements demonstrate that the Intentional Radiator, a Bluetooth device, complies with the limits established in Part 15.247. The digital device emissions were measured and met the Part 15.109, Class B limit. The receiver is exempt from the Part 15.109 requirements as it is above 960 MHz. The applicable rule sections are listed in the following test report.

The anechoic chamber (FCC Reg.No:102724), used for the radiated emissions measurements is located at 30, Hasivim St., Petah Tikva, Israel. The site information required by Part 2.948 of the FCC rules measured in accordance with ANSI C63.4-1992 was most recently renewed.

Sincerely,

Y.Zucker  
QA and Lab. Manager  
QualiTech EMC Laboratory
