Subject: Labelling Proposal for Transmitter with FCC ID: AZ489FT7017.

Dear Sir / Madam,

Motorola Inc., 8000 West Sunrise Blvd., Fort Lauderdale, FL, herein submits its Labelling Proposal for the Transmitter with FCC ID: AZ489FT7017.

Motorola complies to FCC Rule Part 2.925 (d) that the label is permanently affixed and is readily visible to the purchaser at the time of purchase". Further, at the time of purchase, batteries are shipped in another section or compartment of the radio packaging and are not attached to the radio. In some instances they may be shipped in separate boxes. So, the customer needs to physically install the battery by removing the battery cover, if any, or attach the battery before using the radio.

Hence, the FCC label would be visible to the user every time he goes through that exercise! Thus meeting the requirement of FCC Rule Part 2.925 (d).

Further, the placement of the label in the battery compartment is done because space is limited on the exterior of the device. The battery compartment also helps to protect the label from getting obliterated or made unreadable through regular handling and use. It also helps when to further protect the label when it is being used in hazardous situations.

Please contact me at 954-723-5793 if you require any additional information.

Sincerely,  
/s/ Mike Ramnath (signed)
