Subject: Additional Follow-Up Questions Regarding FCC ID: AZ489FT7031

DearMike,

Thank you for your response to the referenced application. Please see below follow-up question pertaining to your submittal.

Follow-Up RT:

1. It appears from the test report, however, that the EUT was not tested in accordance with ANSI C63.4. That procedure requires that the minimum test set up include a pc and 2 different peripheral devices connected to the pc. The EUT is one peripheral, but the second peripheral that appears to be referenced in the test report is a charger. A charger is not a pc peripheral, as there must be data transfer between a peripheral and the pc, by definition. It also appears that the charger was connected to the EUT, and not the pc. If this is the case, please retest the EUT for Part 15B compliance, using a test set up that meets the requirements of ANSI C63.4, and submit the new test report.
R1. Please be notice that FCC approved Microsoft Mouse was connected to the IBM Laptop and used as a second peripheral.
Attached please find revised Ex7 (photos 15 and 16 are added)
- see photographs 9 and 12 at pages 6 and 7 respectively - for setup
- see photographs 15 and 16 - for Mouse information.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
